It's fun I guess. Worth the 147Y is it currently for, but not the full price.. Serious Sam Double D, a spinoff of the Croteam's

horde shooter gem, manages to bring the fun of the classic FPS to a 2D environment. The weapon stacking system brings a lot of choices in gameplay and the levels are never too cheap. Well balanced, fun, simple and has that comical vein that the original Serious Sam made us so accustomed to.. I used to not like Serious Sam Double D, but the XXL version is pretty much a redo and it's a thing that makes the same look, sound, and flow better. Plus it's got co-op so all of you johnnies with friends can do that thing where you stick your metal death into a monster's face and pull the trigger at the same time to make collaborative artwork, so yeah, go ahead and get it.. Me: DAMN i finished already most of serious sams games now what *Serious Sam Double D XXL Appears* me: GUD >:C. It's refreshing to have this angle of gameplay in the long-running Serious Sam series. Normally an FPS, this game changes it's form to that of a twin-stick shooter. If you know Serious Sam you will know that while he himself is as serious as can be, the game he inhabits is not. It is downright maniacal and balls to the walls insane. You never get a break from shooting. You never wash the guts off your face. You learn to like the taste of guts. Eat them for breakfast. Snacks. Hide them in your lunchbox. AND LIKE IT. YUM. Coolest thing about this game - GUN STACK. You can literally stack your guns, any and all guns, on top of each other. A shotgun on top of a chainsaw with a laser gun underneath a grenade launcher? YES PLEASE. What about a shotgun underneath an assault rifle that's on top of a swarm gun that is underneath a plasma rifle? KILL OR BE KILLED.. 2serious4me. Gun! Stacker!. gooooooooooooooooood game play it like a BOSS !!
